Clinical Psychologist

We're looking for a Clinical Psychologist to provide psychological assessment and evidence-based therapy for children and adolescents within our multidisciplinary CAMHS team.

What You'll Do

- Carry out psychological assessments and diagnostic work for children and young people
- Deliver evidence-based therapy: individual, family, and group
- Manage your own outpatient caseload and contribute to risk and safeguarding decisions
- Work closely with psychiatrists, therapists, and nurses
- Supervise and support junior psychologists and trainees
- Keep accurate clinical records in line with DHA standards

What We're Looking For

- Doctorate or Master's in Clinical Psychology from an accredited institution
- Holding a valid DHA licence as a Clinical Psychologist
- 2–5+ years' post-qualification experience, ideally in CAMHS
- Confident delivering therapies such as CBT, DBT, or family-based approaches
- Strong risk assessment and safeguarding skills
- Culturally sensitive approach to care

Nice to Have

- Specialist training in child/adolescent therapies or neurodevelopmental assessment
- Arabic language skills
- Experience in research, training, or clinical workshops
